## Turnaround

## Custom-made charts available

Handsomely designed, 8 1/2" x 11", frameable family charts made to order. These are not done from a template. Each is custom-designed and specific to the information known about a family line, and includes notes about military service. Inquire about prices.

Note: We do not commonly order official hard-copy service records and birth, death, and marriage certificates from national and state archives due to confusion (they may come to us rather than the client) and cost (client must pay directly for such records). However, a walk-through of how and where to order such records may be included in research fees. In special cases, we will waive this and order records on a client's behalf using client's preferred method of payment.
